

Reforestation Nan

Proven Solution for Sustainability,
Economy, and Climate Resilience

Concern
Must act now

Solution
Cooperation

Return
Better Nan

Over **900,000 rai**
of forest lost to
monoculture farming

250,000 rai
targeted for agroforestry,
natural regeneration, and
sustainable land use

Environmental Gains

1.5m tons/yr of Carbon
sequestration **40% reduction**
in soil erosion,
securing farmlands

30% improvement
in water retention, reducing
floods/droughts

Rising floods, droughts, and
soil degradation threaten
1.2m residents and
4bn thb/yr
worthed of agriculture

3x
faster forest recovery
using innovative planting methods
Miyawaki forests, biopolymer hydration

Economic Benefits

12% agriculture yield increment through soil
rehabilitation **1bn thb annually** in green tourism growth

+4,000 jobs
in sustainable forestry, tourism, and local
businesses

45% of Thai's water come
from Nan, but forest covers
70% to 50%
from deforestation cut

Backed by
 
AFoCO + Thai Govs.

Social Impact

Healthier Community

Better Food Security
