BACKGROUND

Copenhagen Zoo was established in 1859. It is located in Copenhagen, Denmark. The zoo can be recognized by its tower that rises above the city. Initially, the zoo wasn't more than 4,000 square meters with only a fox in a chain, a seal in a bathtub and a turtle in a bucket. In 1977, the zoo began receiving subsidies from the government. From the 1980s to 1990s, the zoo started modernizing itself such as its building and more animals. Unfortunately, the 2008 financial crisis caused consumers to spend less on leisure activities, resulting in a reduction in government-supported subsidies. As a result of the crisis, the number of visitors gradually declined from 1.4 million to 1.1 million from 2008 to 2012. In 2012, Steffen became the new CEO with great prospects in developing the zoo to a new level such as developing "ideal-generation-culture".

SWOT ANALYSIS

STRENGTH

- Strong brand recognition locally
- Strong relationship with employees
- Various courses, activities and events
- Loyalty customers
- Suitable for any type of customers

WEAKNESS

- Unrecognition brand in global

IMPACT

OUR SOLUTION

CAPACITY AND SERVICE LEVEL ISSUES

- BOTTLENECK AT MAIN ATTRACTIONS

WEATHER AND SEASONALITY PROBLEMS

- FLUCTUATION OF VISITORS
- CLOSED SERVICES AND FACILITIES

FLUCTUATION OF VISITORS

- Reduce entrance fee, especially in rainy season
- Add more activities that are only available on rainy days from the change of animals behavior
- Add rain-protected merchandises: umbrella and raincoat
- Add creative promotion in each off-season period: Valentine Promotion and Family Wednesday Promotion.

Result: From those actions, Copenhagen Zoo **increases spend-per-visitor** therefore more revenues for a company.

FUNDING PROBLEMS

- DECLINED IN GOVERNMENT SUBSIDIES
