Yoho AI Assistant

Purpose >> A virtual Personal Shopper in Yoho E-commerce platform

How?

- 1) provide short explanation about the product
- 2) AI use NLP (natural language process)
to turn product info → simple advertisement
- 3) customer can choose AI helpers that match for their usage

Benefits

- ✓ help customer choose product easily
- ✓ first Hong-kong ecommerce that have AI-shopper

Problem

- X limit function
- X cannot fully personalized customer needs

Future Plan ↑

- 1) full product comparison tool
- 2) 24/7 AI chatbot
- 3) help membership

customer Analysis

Tech-Savvy customer

Target: Gen Z
& Millennials
(20-30 yrs)

Income level
High - Medium

Expectation
Fast response
from service

Pain Point !

- 1) Fear of buying electronics online
due to damage concerns

Core Need

- Ability to buy confidently
- online real-time advice
- Fast & accurate comparison

Communication

Online Shopper > buying goods online regularly

Emotional trigger

- exclusive deal, discount

seek quick information, AI assistant
that can give accurate advice, safe offline
touchpoint!

Implementation

Beyond Borders, Beyond Categories

?
WHAT

YOHO plans to rebrand and integrate J SELECT to help localize its entry into cross-border market and expand into premium lifestyle categories.

?
WHY

J SELECT has Existing brand equity and experience operating in mainland china.

?
HOW

- Rebrand J SELECT under the YOHO umbrella While keeping its premium image intact
- USE J SELECT's existing supplier and Product network to populate the new "YOHO Premium Lifestyle" category
- Exclusive deals into "YOHO First" membership drive sign-ups and loyalty among customers
