GROUP SALLY

Executive Summary

Strategy

မူပိုင်
Feature Model

Go-to-Market
Strategy

Future Plan

A model that can enhance the seamless user experiences of appointment creation

Marketing strategies that help acquire both of B2B and B2C Customers

Implement the model with other industries apart from food

Number
of users

Situation Analysis

“မူပိုင်”

Business Model

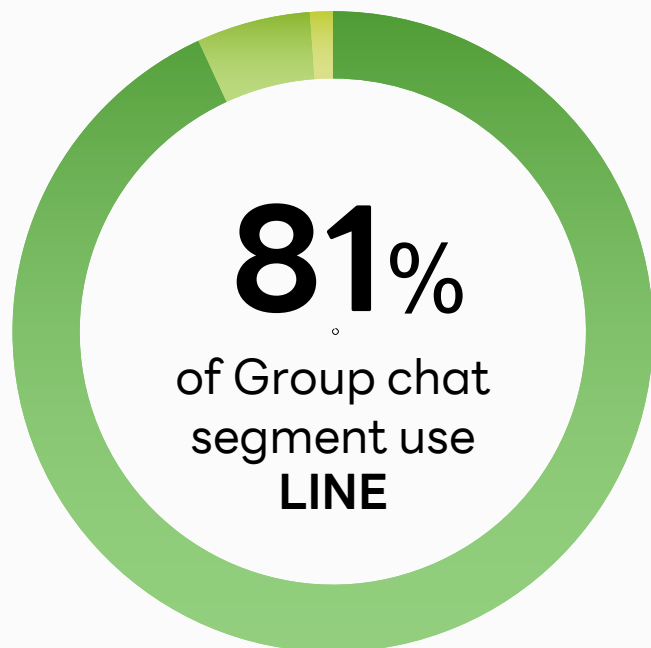

Impact

Current Situation

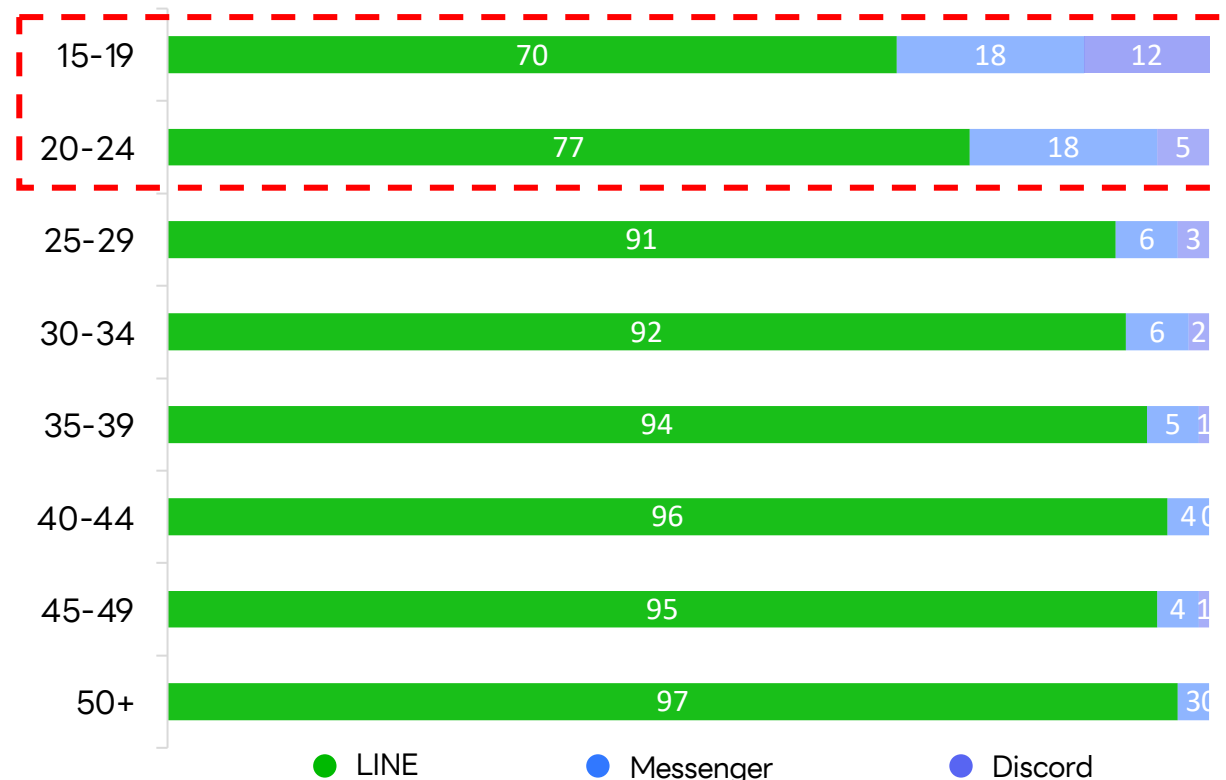

The usage of LINE Group Chat in Gen-Z segment tend to decrease, while competitors' increase

Percentage of Group Chat Usage

Application Usage Segment by Age

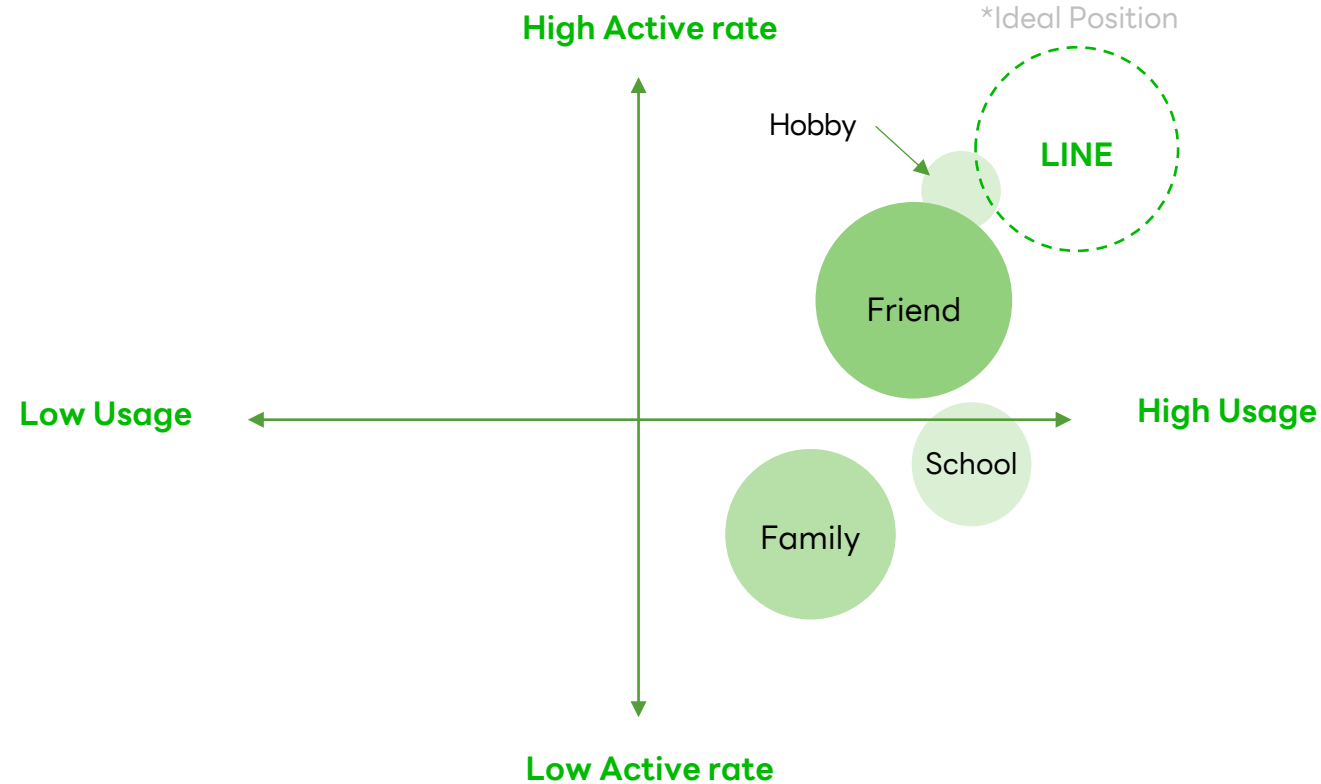

Ultimate Goal

“Gain more users back to LINE from competitors by focusing on students and first jobbers”

Target Segment Analysis

Reasons behind of LINE usage and active in 4 different segments, focusing on users in age 15-24

Reasons

Friend

There are 86% usage, but only 66% active rate due to an unsatisfied in LINE features as it can be seen in an increase rate in that of competitors

Family

There are 60% usage, but only 36% and 6% active rate for those who live together and long distance thanks to different interest and lifestyle

School

The segment usage is high as it can be seen that almost 100 % of users is already use LINE with 47% active rate, but the market size is very small

Hobby

The segment usage is high as it can be seen that almost 100 % of users is already use LINE with 80% active rate, but the market size is smallest

Note

*The ideal position is where LINE can achieve the highest level of both usage and active rate concurrently

Key Implication

“In order to optimize our time constraints, LINE should prioritize the segment that has the greatest potential impact”

Matrix Criteria

After consider both increasing and acquiring factors, friend segmentation is the most appropriate target for LINE

Goal for selection

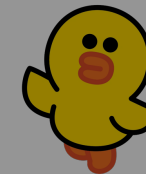

Due to time limited, we should create the greatest potential impact by increase an active rate of current users rather than focus on acquire new users

Evaluation of Target Segmentation

	Increasing active rate factors					Acquiring factors					
	Current Active Rate		Feasibility to Time			Risk of Investment			Difficulty to Change Users' Behavior		
Friend											
Family											
School											
Hobby											

Matrix Criteria

After consider both increasing and acquiring factors, friend segmentation is the most appropriate target for LINE

Goal for selection

Due to time limited, we should create the greatest potential impact by increase

Key Question

How can we gain more active rate from this target group?

Hobby

Situation Analysis

“เปิดดี”

Business Model

Impact

“iPod” Feature Model

One stop service platform, increasing users experience

Target Segment Analysis

The younger generation, known as Gen Z, utilizes the LINE Group Chat as a convenient platform for scheduling appointments

**Jeen, 21 years old
University Student**

Characteristic

“Social diner” - enjoys dining at restaurants, particularly when it involves socializing with a group of friends

40%

of monthly spending is placed
on Dining out with Friends

60%

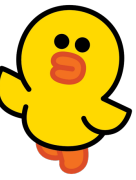

of time per month is scheduled
for Dining out with Friends

Value

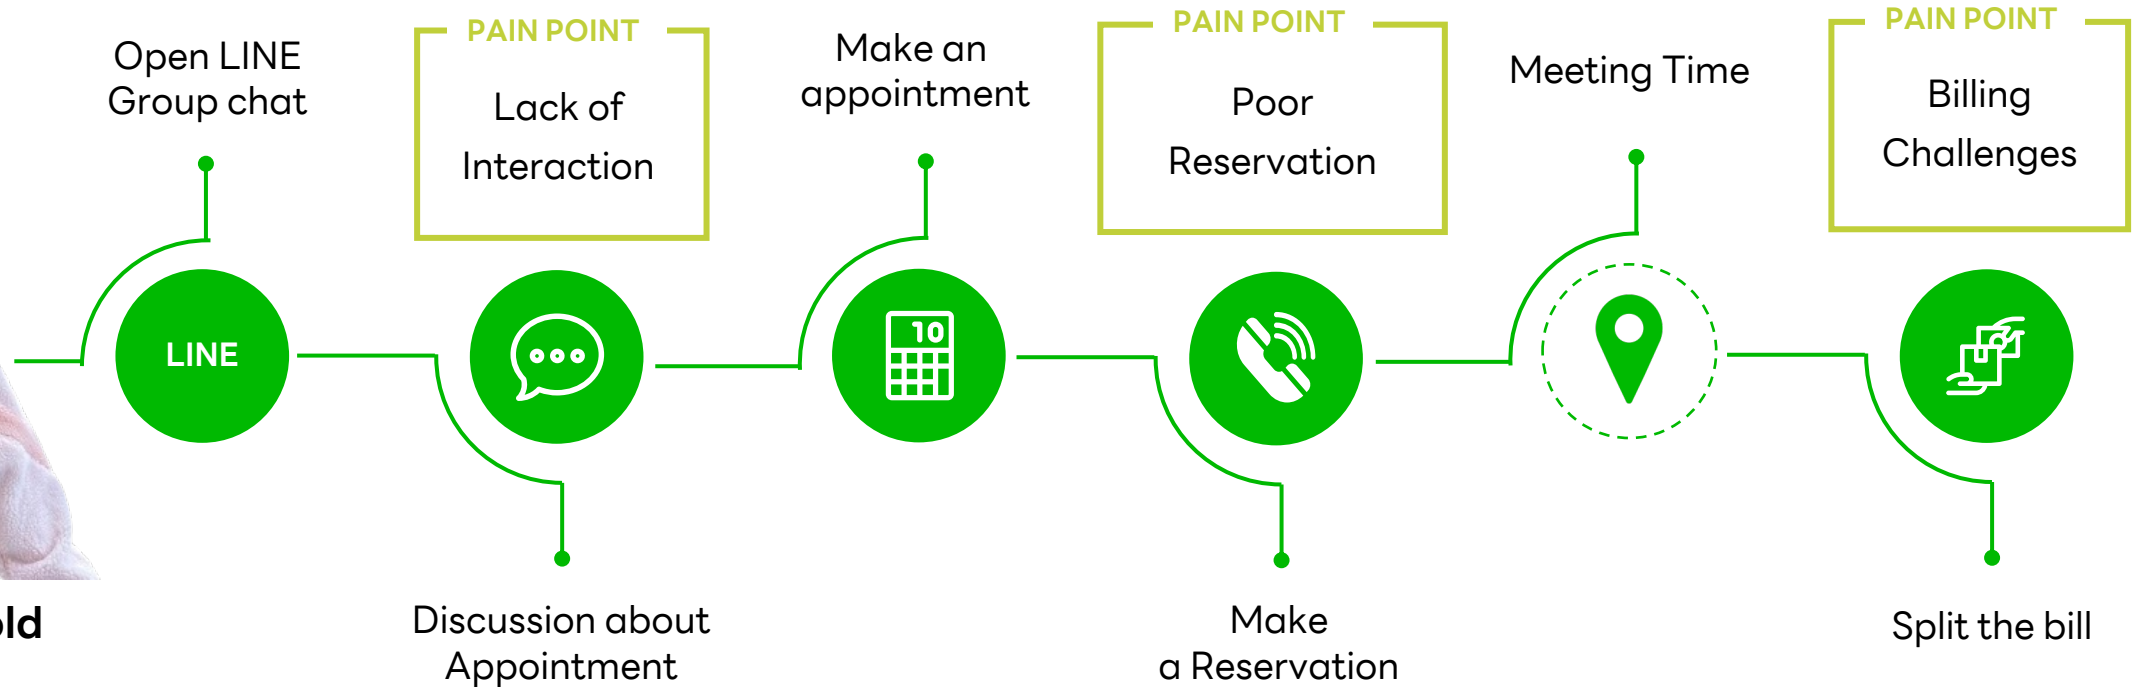

“Stay connected with friends” - more about social interaction than just satisfying hunger

Customer Journey

In the process of scheduling an appointment of our persona, we encounter 3 key stages that present challenges from beginning to end

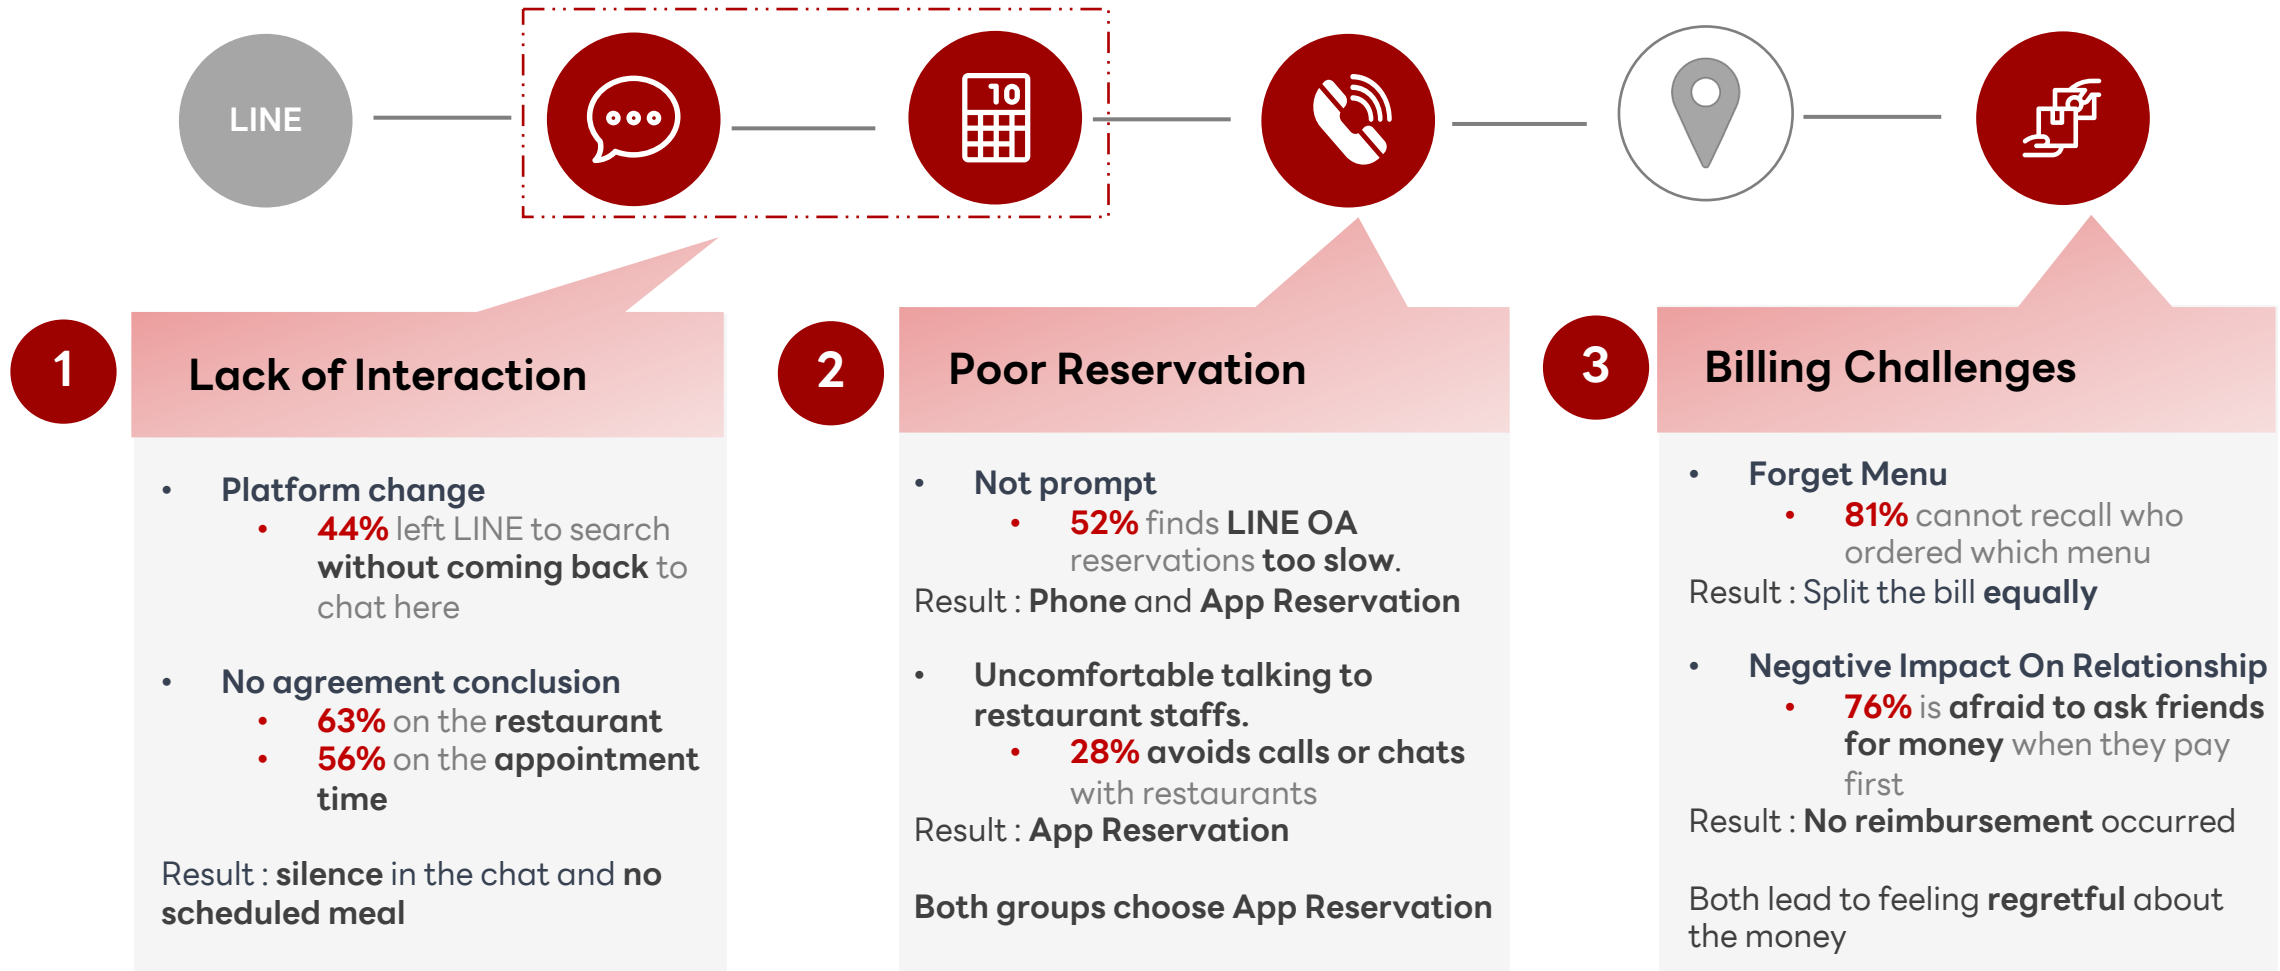

**Jeen, 21 years old
Social Diner**

Success Barriers

Customer's pain points are segmented into three key barriers to address

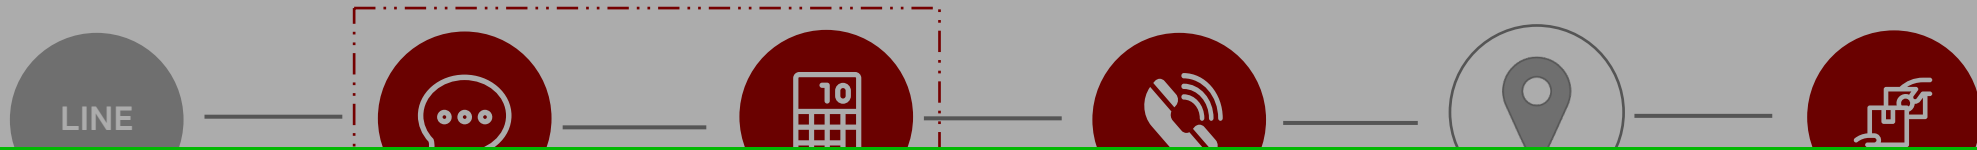

Key Takeaways

Customers need a new approach providing dining experience with group engagement, seamless reservation, and reminder to avoid bill-splitting issues

Success Barriers

Customer's pain points are segmented into three key barriers to address

Key Question

How to create one-stop service platform to break those barrier ?

Result : **silence** in the chat and **no scheduled meal**

Both groups choose **App Reservation**

Both lead to feeling **regretful** about the money

Key Takeaways

Customers need a new approach providing dining experience with group engagement, seamless reservation, and reminder to avoid bill-splitting issues

“เป็ดดี” Feature Model

“เป็ดดี” is the model that can enhance the seamless user experiences of appointment creation

จัด

ARRANGE

Enhance restaurant dining with
shared LINE OA and group chat
Poll voting feature

จอง

RESERVE

Book and reserve a table for your
group directly via LINE Group

จ่าย

PAY

Expense sharing for groups
based on individual orders

“เปิดตี้” Feature Model

“เปิดตี้” is the model that can enhance the seamless user experiences of appointment creation

จัด

ARRANGE

Enhance restaurant dining with
shared LINE OA and group chat
Poll voting feature

จอง

RESERVE

Book and reserve a table for your
group directly via LINE Group

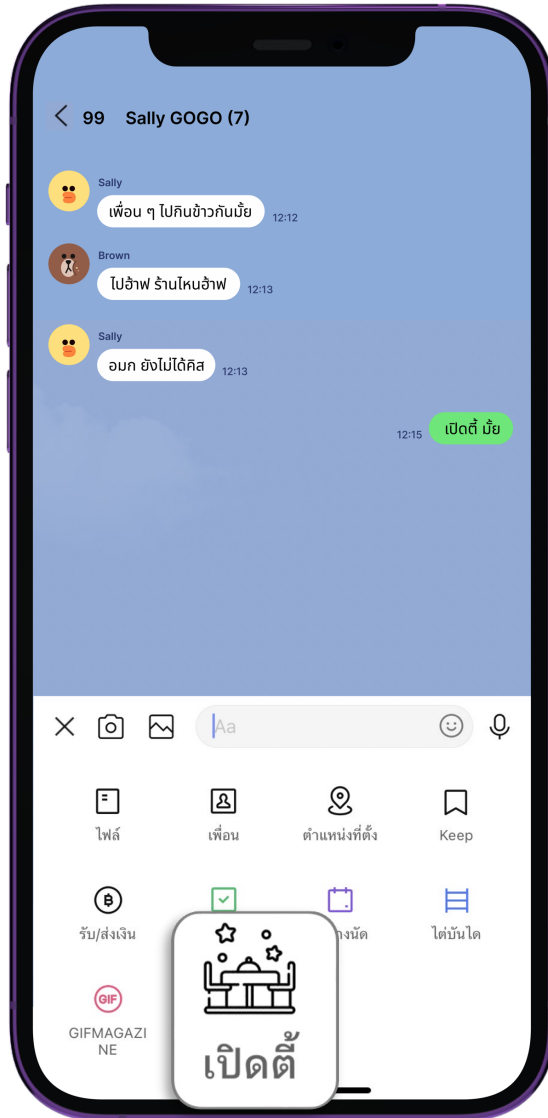

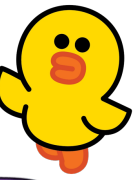

จ่าย

PAY

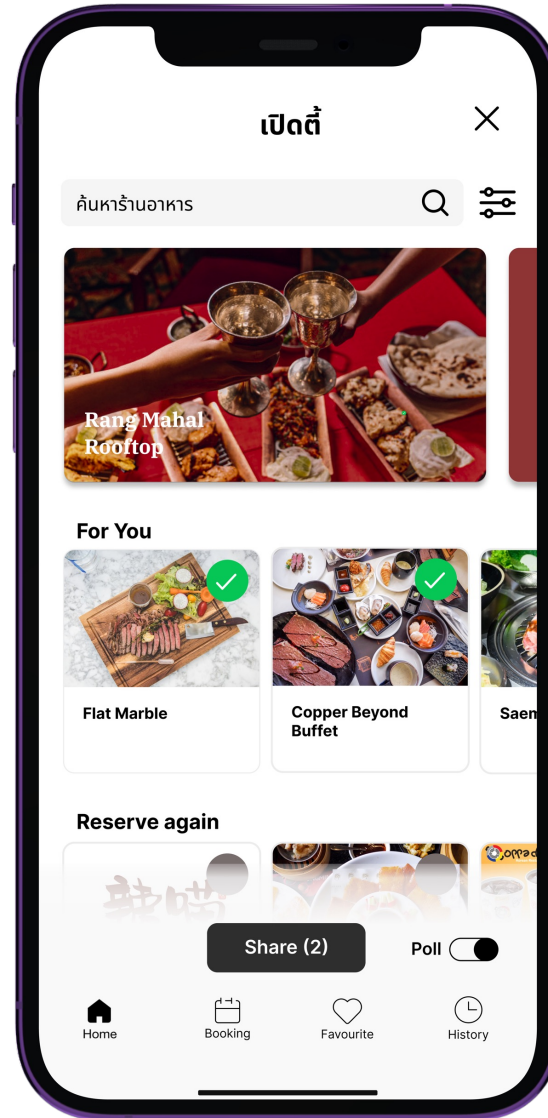

Expense sharing for groups
based on individual orders

จัด – Arrange

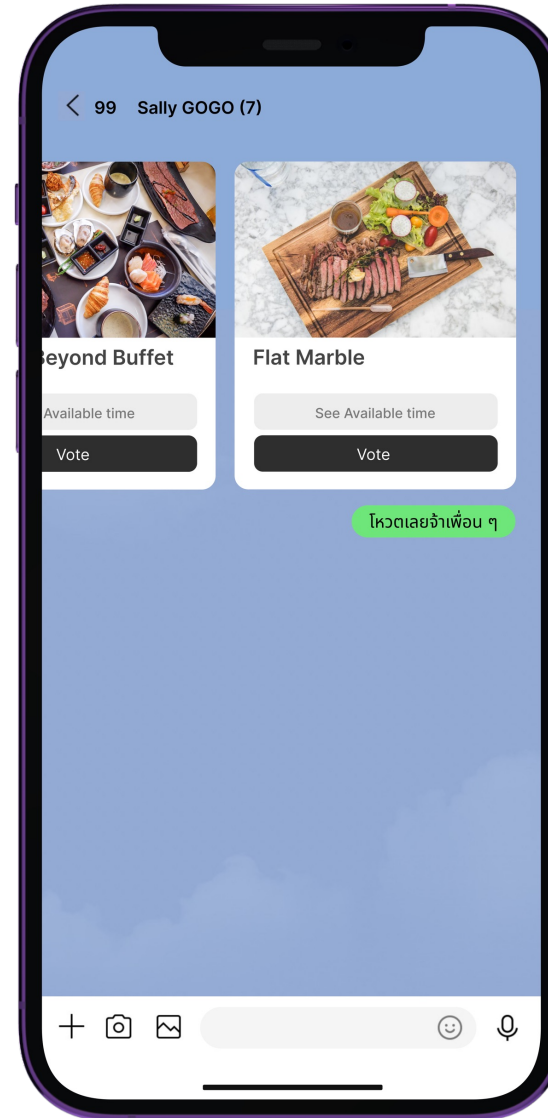

A feature that arranges effective restaurant dining by sharing LINE OA and conducting Poll voting in a group chat

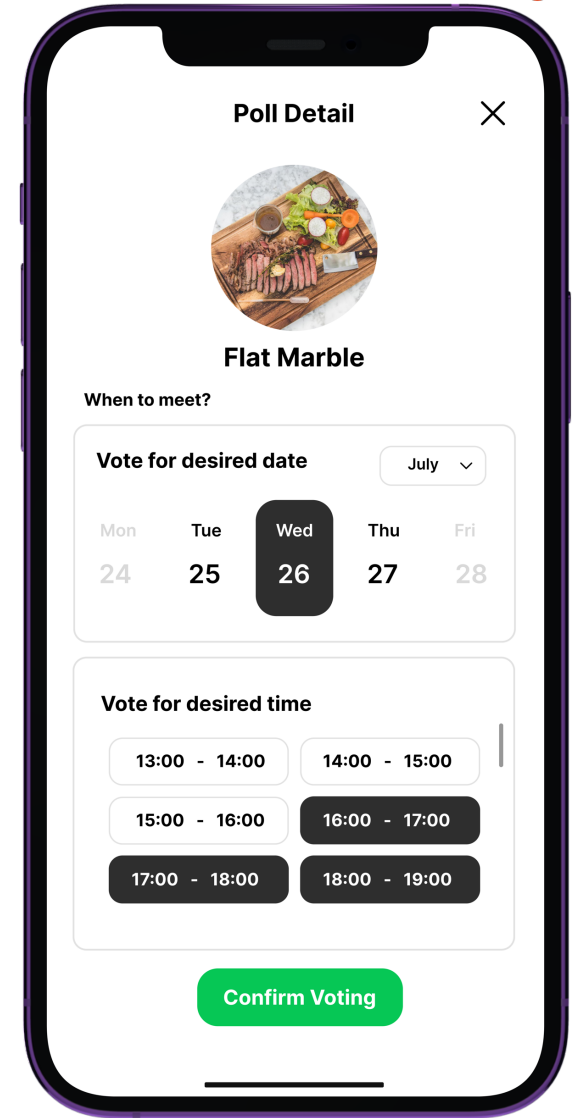

Situation Analysis

“เปิดดี”

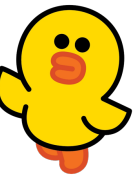

Business Model

Impact

จัด – Arrange

Using the Arrange feature, we highlight three key points to solve group appointment pain points

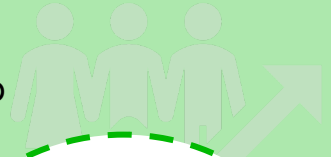

จัด

จอง

จ่าย

Increase Interaction

- Share restaurant info from LINE OA in group chat without switching app
 - Viewing such as location, price. etc.
 - Trustworthiness increased

Speed Up the Deal Closing Process

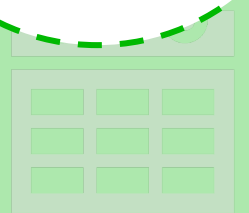

- Easy to create the poll
- Card Based Poll is not restricted to view

The seamless experience can increase user engagement up to

64%

Decrease the appointment cancellation rate

- Set a date that works for all
- Found a restaurant that meets the preferences of the members
- Reduce conflicts within the group

“เปิดดี” Arrangement involves only SHARING and VOTING for restaurants' LINE official accounts in the group chat

Source : <https://shorturl.at/dfno8>

“เปิดตี้” Feature Model

“เปิดตี้” is the model that can enhance the seamless user experiences of appointment creation

จัด

ARRANGE

Enhance restaurant dining with
shared LINE OA and group chat
Poll voting feature

จอง

RESERVE

Book and reserve a table for your
group directly via LINE Group

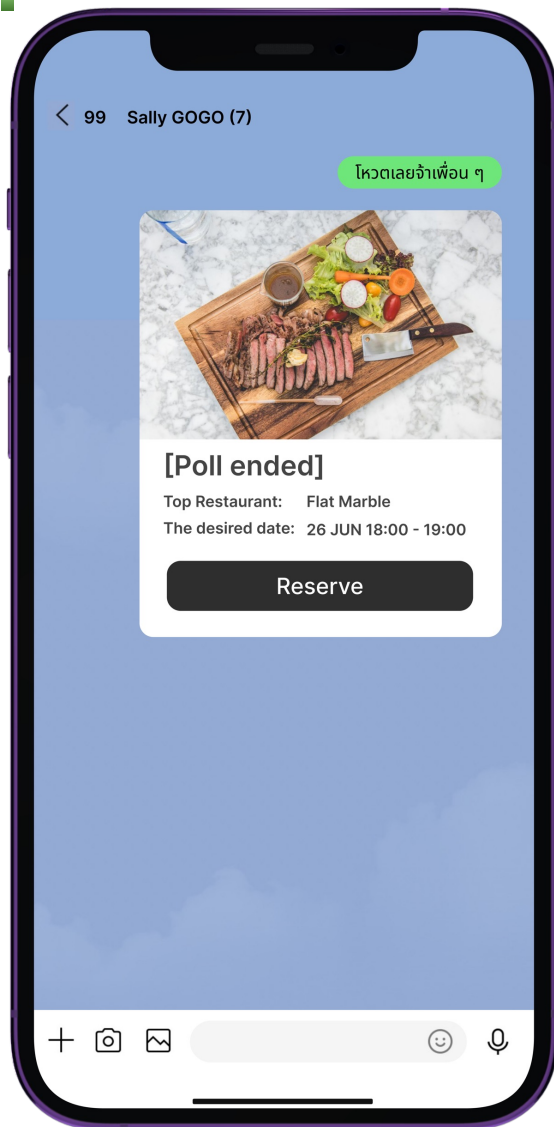

จ่าย

PAY

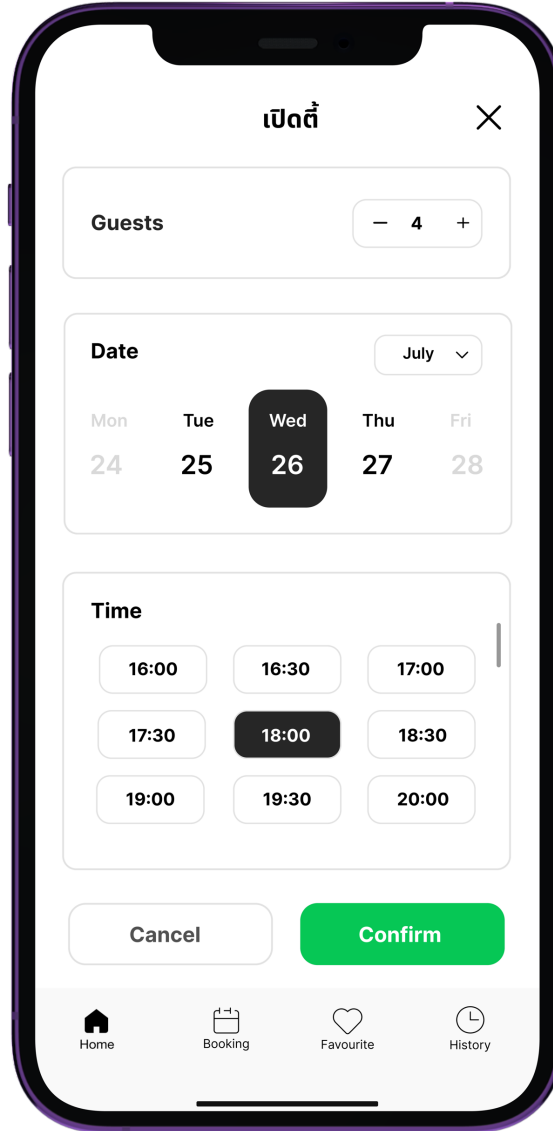

Expense sharing for groups
based on individual orders

จอง - Reserve

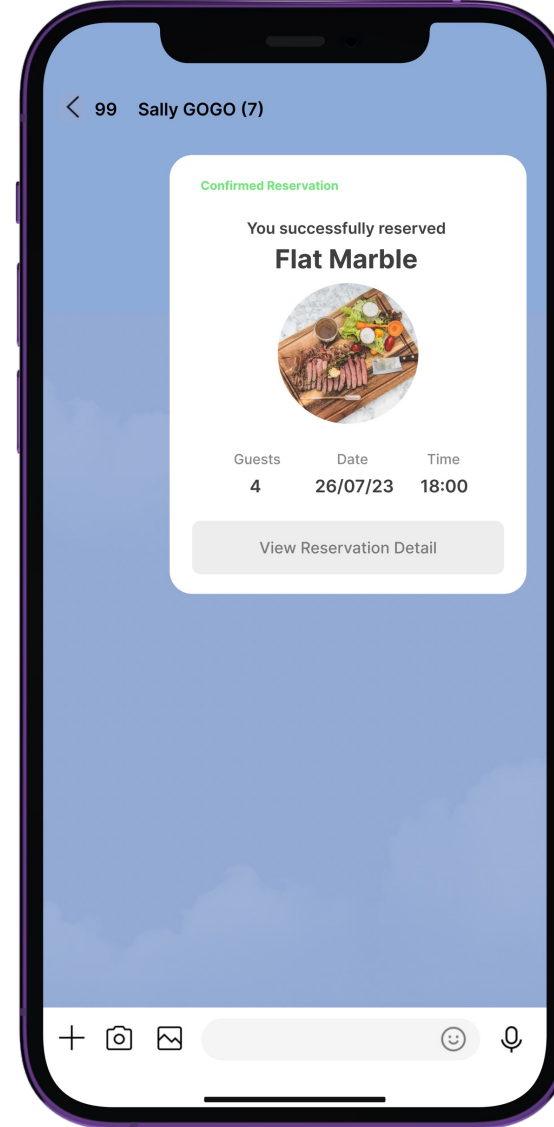

A feature that can reserve a seat based on group friends preferred date & time without calling to a restaurant's staff directly

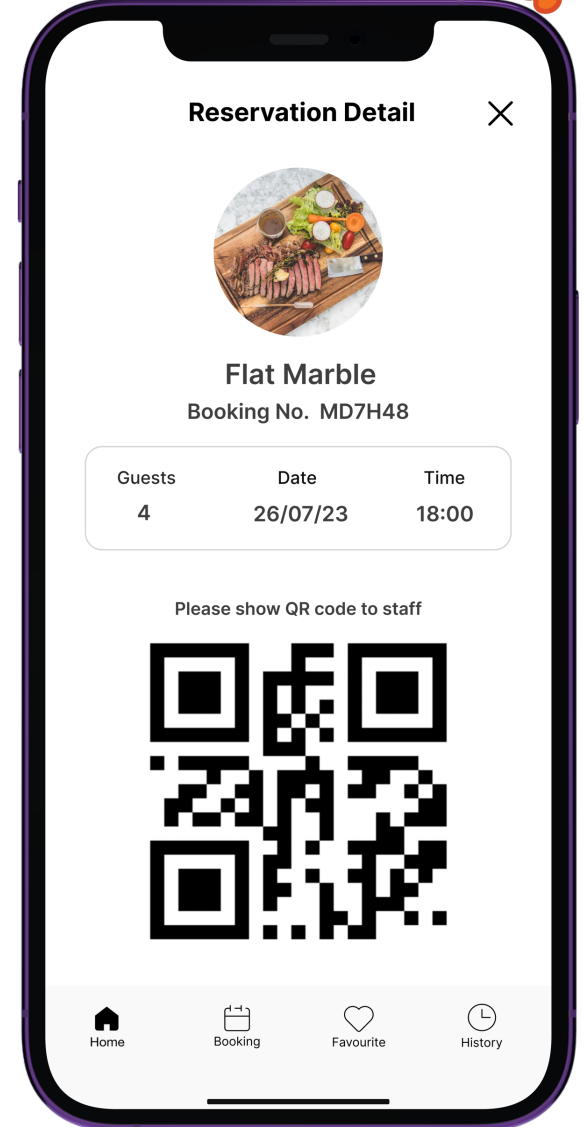

Situation Analysis

“เปิด”

Business Model

Impact

จอง - Reserve

The feature addresses the poor reservation problem by eliminating the need for staff calls.

จัด

จอง

จ่าย

Rich Information

- Access to the restaurant immediately
- No more spending time asking staffs for information

No Awkward Interaction

- No more hard-time communication with staffs
- Don't have to prepare yourself for asking staffs

Immediate Response

- Don't have to wait for phone calls
- Eliminate phone calls unavailability from the restaurant

Solved

Poor
Reservation

Reserve

เปิดดี Model

“เปิดดี” is the model that can enhance the seamless user experiences of appointment creation

จัด

ARRANGE

Enhance restaurant dining with
shared LINE OA and group chat
Poll voting feature

จอง

RESERVE

Book and reserve a table for your
group directly via LINE Group

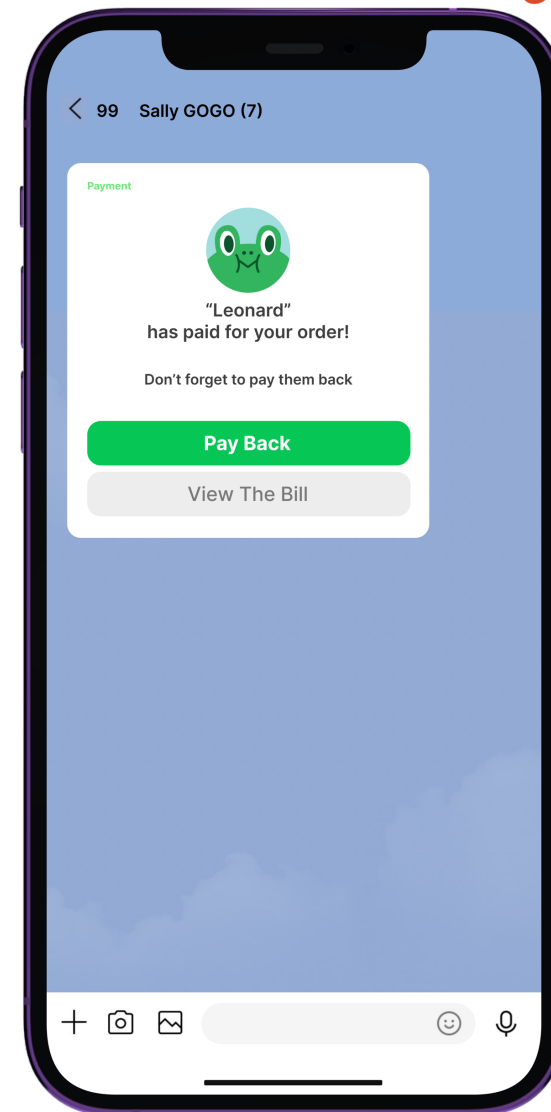

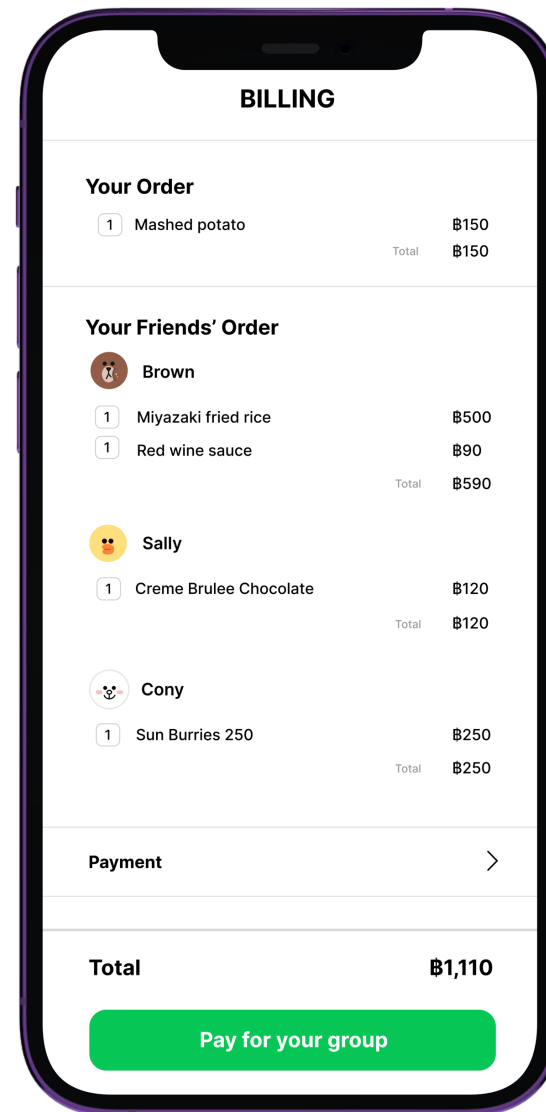

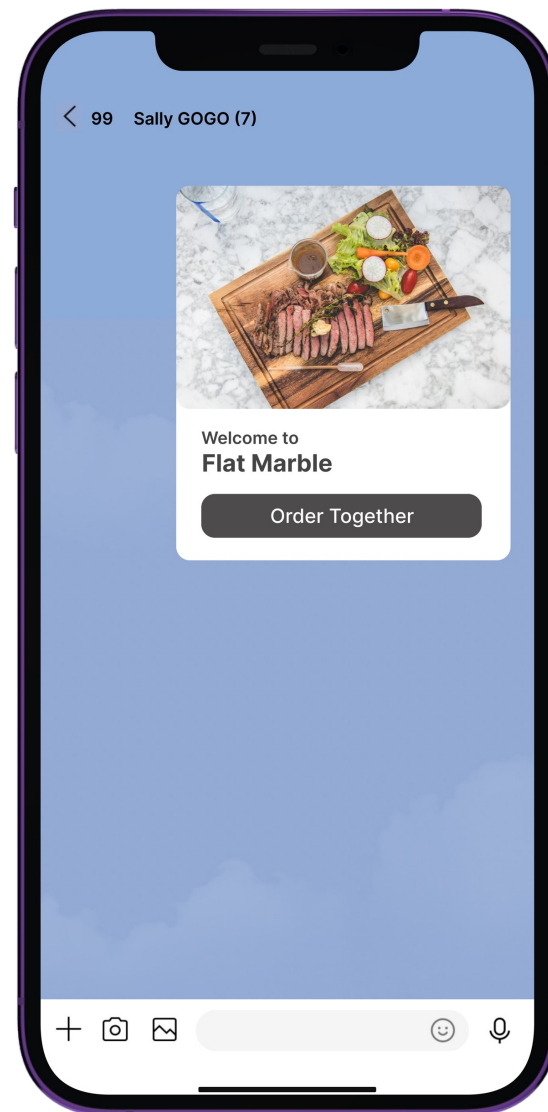

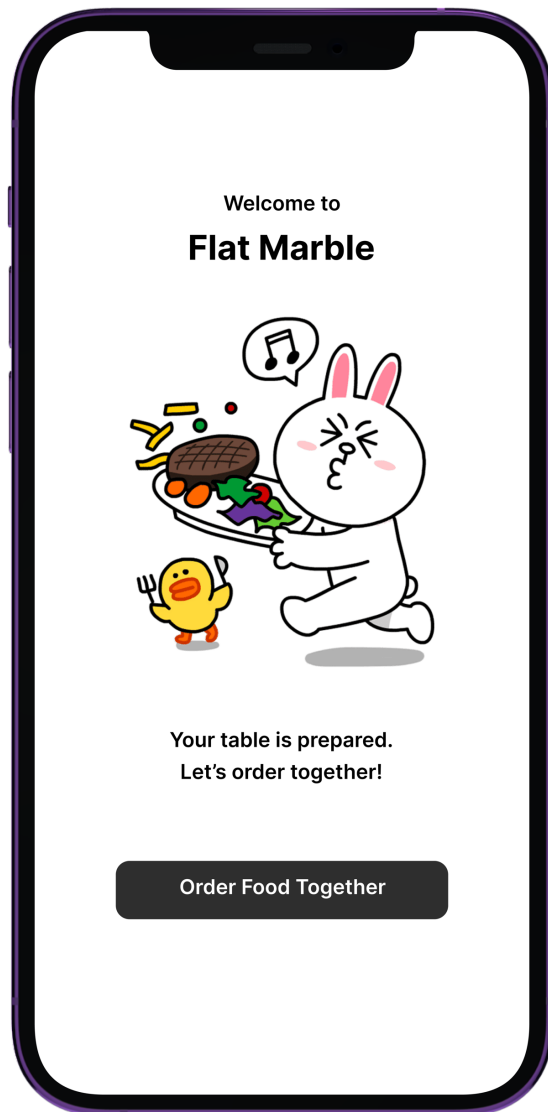

จ่าย

PAY

Expense sharing for groups
based on individual orders

จ่าย - Pay

A bill sharing feature for groups, where expenses are divided according to each member's order

Situation Analysis

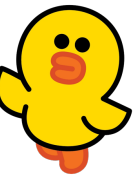

“เปิดดี”

Business Model

Impact

จ่าย - Pay

From using the pay feature, we have identified two key points which can solve pain points

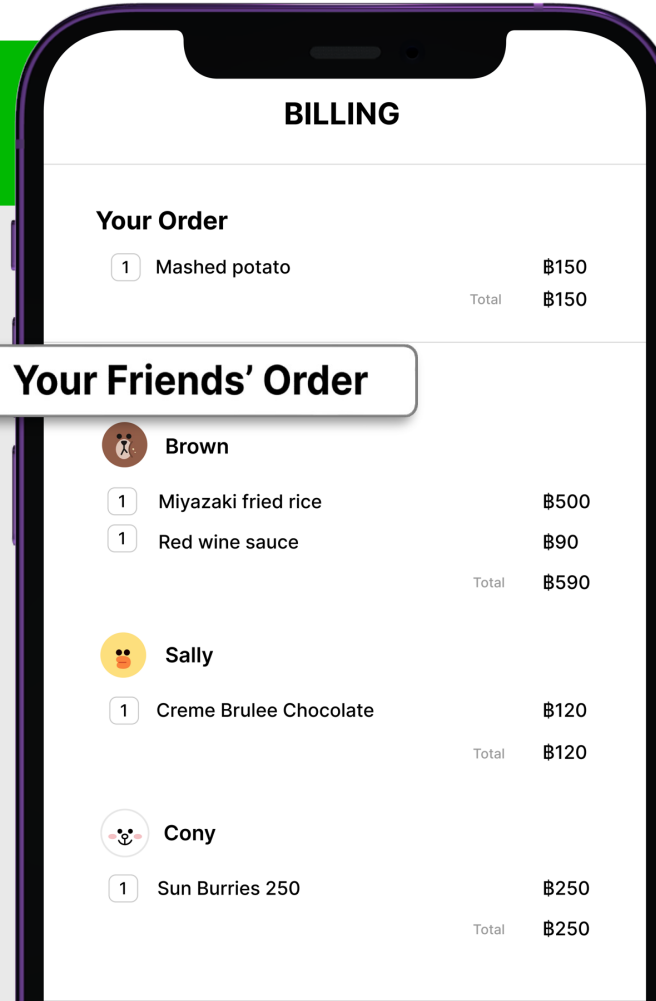

จัด

จัด

จ่าย

Track Bill History

- Generate automatic bill from history
- User-friendly bill splitting method

< 99 Sally GOGO (7)

Payment

"Leonard"
has paid for your order!

Don't forget to pay them back

Pay Back

View The Bill

Retain Good Relationship

- Automatic pay back notification
- Reduce awkwardness when asking your friends to pay back the money

Situation Analysis

“เปิดดี”

Business Model

Impact

Competitive Advantage Over Competitors

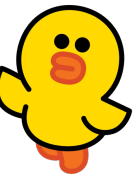

Among all of the competitors in the market, “ເປັດຕີ” can cover all user’s need

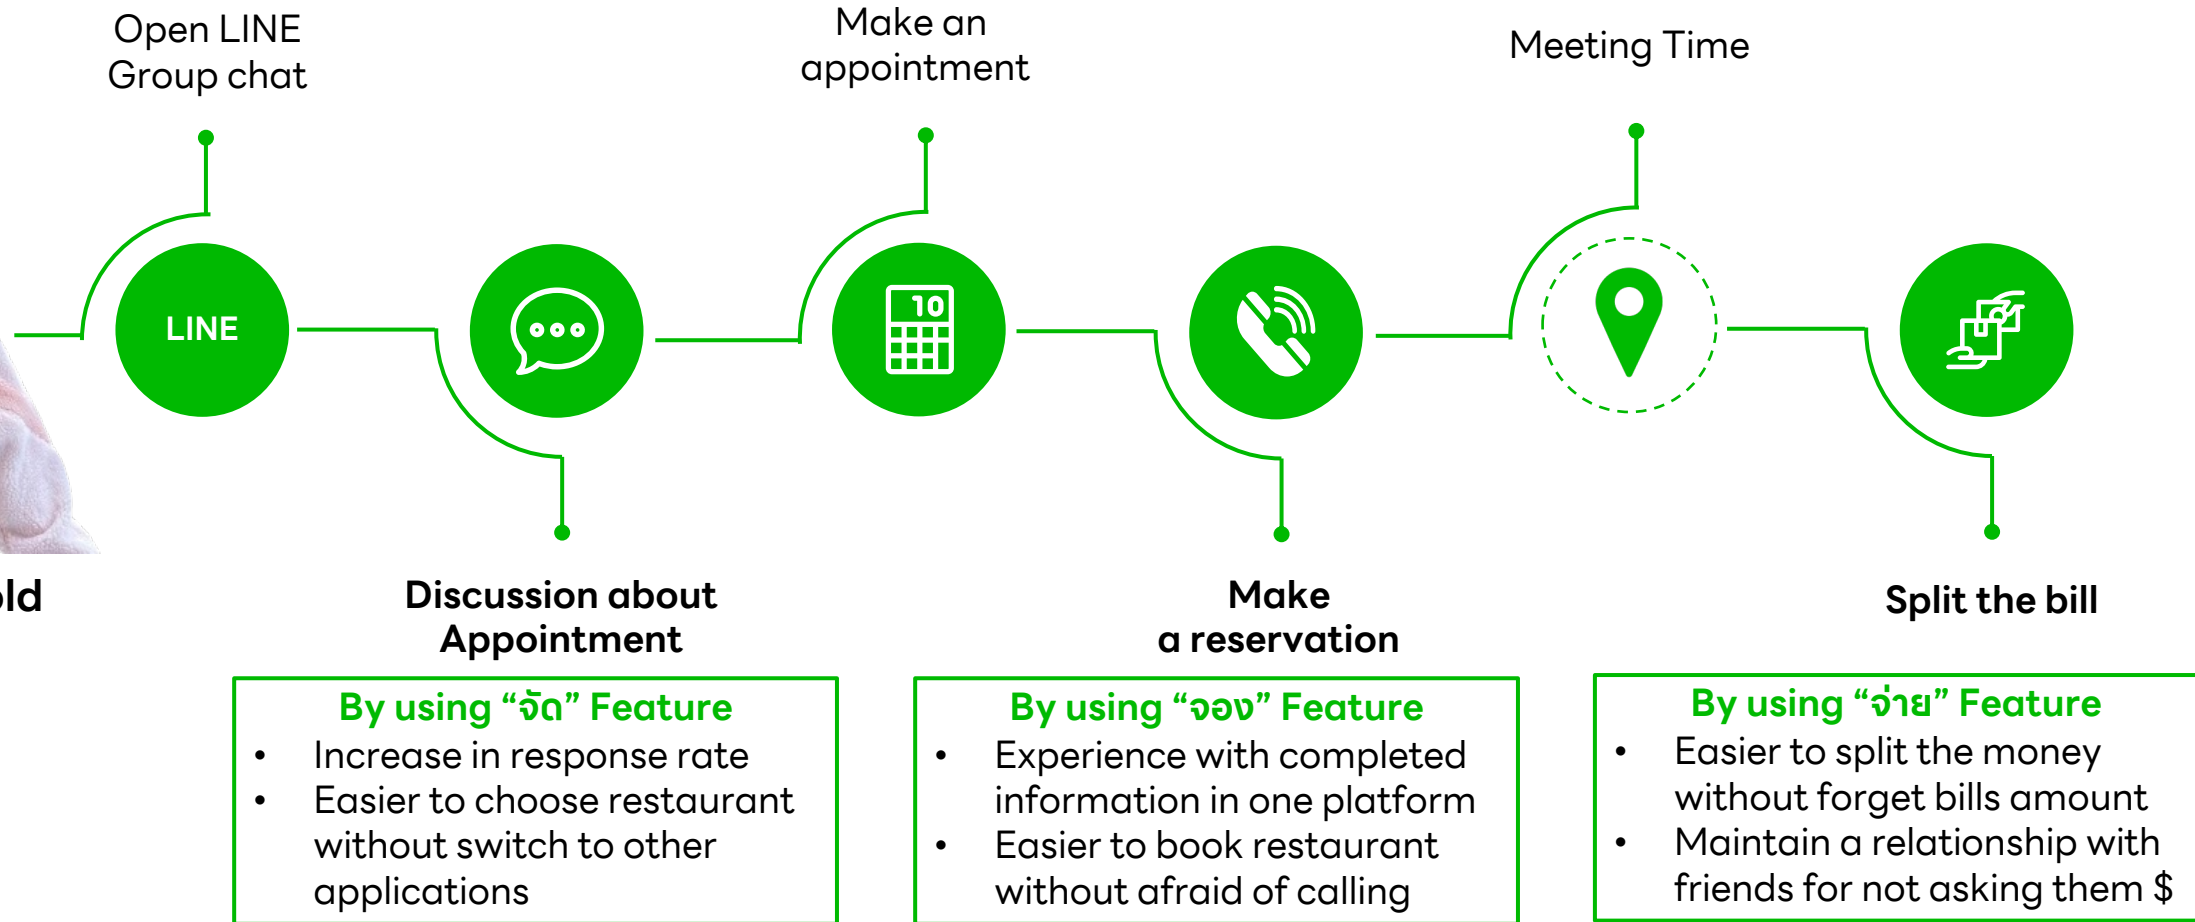

Competitors Analysis	 ເປັດຕີ	 QueQ	 Hungry Hub		 Splitwise
1. Restaurant Information	✓	✗	✓	✓	✗
2. Promotion & Rewards	✓	✗	✓	✓	✗
3. Reservation	✓	✓	✓	✓	✗
4. In-App Payment	✓	✗	✓	✗	✗
5. In-App Menu Ordering & Recording	✓	✗	✗	✗	✗
6. Order Recipient Splitting	✓	✗	✗	✗	✓

Customer Journey

After “เป็ดดี” has approached the customer journey, the pain points have been solved

Jeen, 21 years old
Social Diner

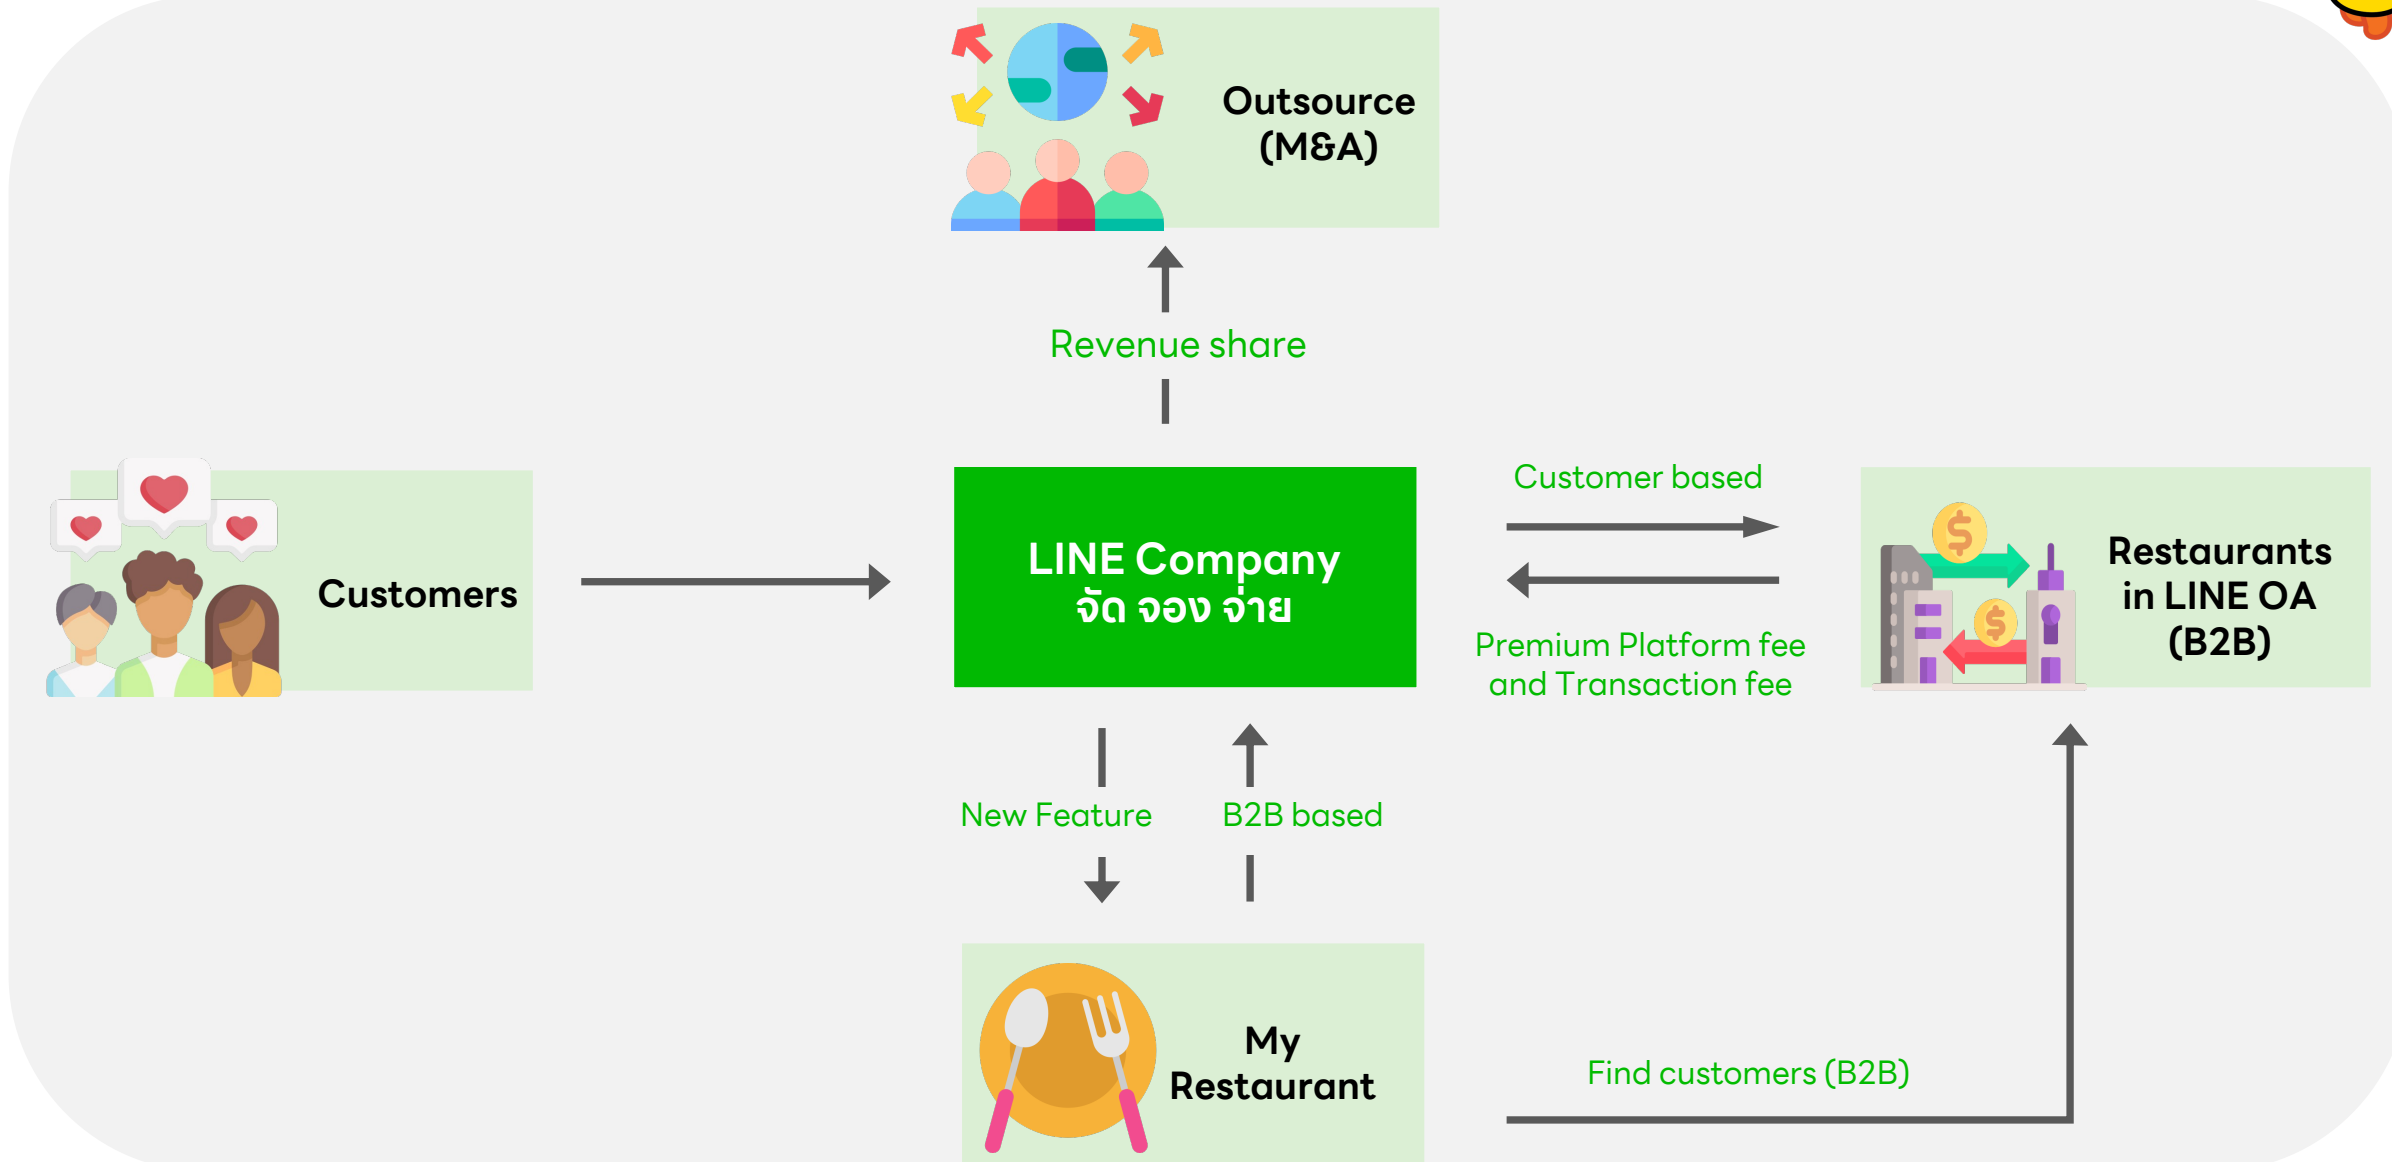

Business Model

Strategy to acquire both B2B and end-users

Business Model – How do we operate

Marketing Campaign (B2C)

The first step is to raise awareness of the features by running ads across various platforms and hiring KOLs who are popular among the targeted customers

Raise awareness

INTERNAL MARKETING

Internal Marketing

“Smart channel ad”

“Internal OA”

EXTERNAL MARKETING - Advertising

Advertising Platform

EXTERNAL MARKETING - KOL

Goy Natty Dream

1.76M Subscribe

Brinkkty

602K Subscribe

Peach Eat Laek

8.68M Subscribe

- Their content is mainly **about hanging out with friends**, including **eating out**

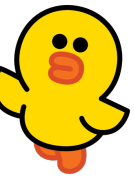

- **Food Influencer**

All of them...

- have a positive image
- have a majority of Gen Z followers
- have potential in attracting Gen Z to use the feature

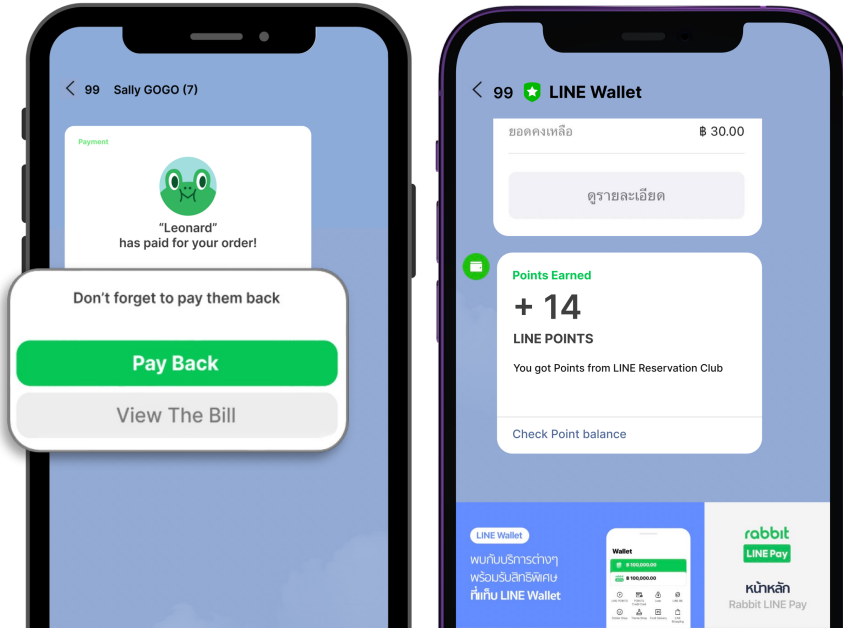

Marketing Campaign (B2C)

Launch marketing campaign “จอง จ่าย แอ กพอ ยักษ์” and promote through offline marketing to increase customers’ call to action

Call To Action

จอง จ่าย แอ กพอ ยักษ์

Campaign Duration: 1 year

LINE Point will automatically flash back to your wallet after paying the bill back to “หิวดี”

WHAT

Receive **FREE LINE POINT** from **booking** restaurant and **paying** the bill via LINE

BENEFIT from collecting LINE POINT

Discount coupons for every services in LINE STORE
ex. LINE Shopping, LINE Sticker

1 **P** = 1 Baht

WHY

Incentives young generation to use **เปิดดี** and convert them to use our platform

Offline Campaign

“Table Top Advertising”

Printing and distributing to our Gen Z most visit restaurant partners

“Loyalty Stickers”

A restaurant that uses our feature must conform to show the feature’s sticker

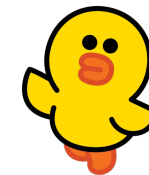

OBJECTIVE

Raise **awareness** among Gen Z Diners and **convert** them to be our users for the next time

Marketing Strategy (B2B)

Implement internal marketing to acquire partner-based and create success case campaign to strive for more

Pre-Launch

Partner with LINE My Restaurant

Contact restaurants that already implement my restaurant in LINE OA to join **เปิดดี** for **FREE**

1

Broadcast the benefit of implementing "เปิดดี" feature via LINE Internal OA and smart channel ad

Collect data from the broadcast open rate for **retargeting** after the launching process

2

OBJECTIVE

Increase awareness and collect potential partner-based preparing for the launching step

Post-Launch

Success case Campaign

1

Tracking performance of all partners and choose 5 successful brands to promote in SME Biz Talk

2

Educate SME restaurants via LINE Certified Coach

OBJECTIVE

Highlight how **เปิดดี** help **acquire** new customers, **maintain** old customers, and **generate more revenue** to B2B

PROCESS

Interview

VDO Production

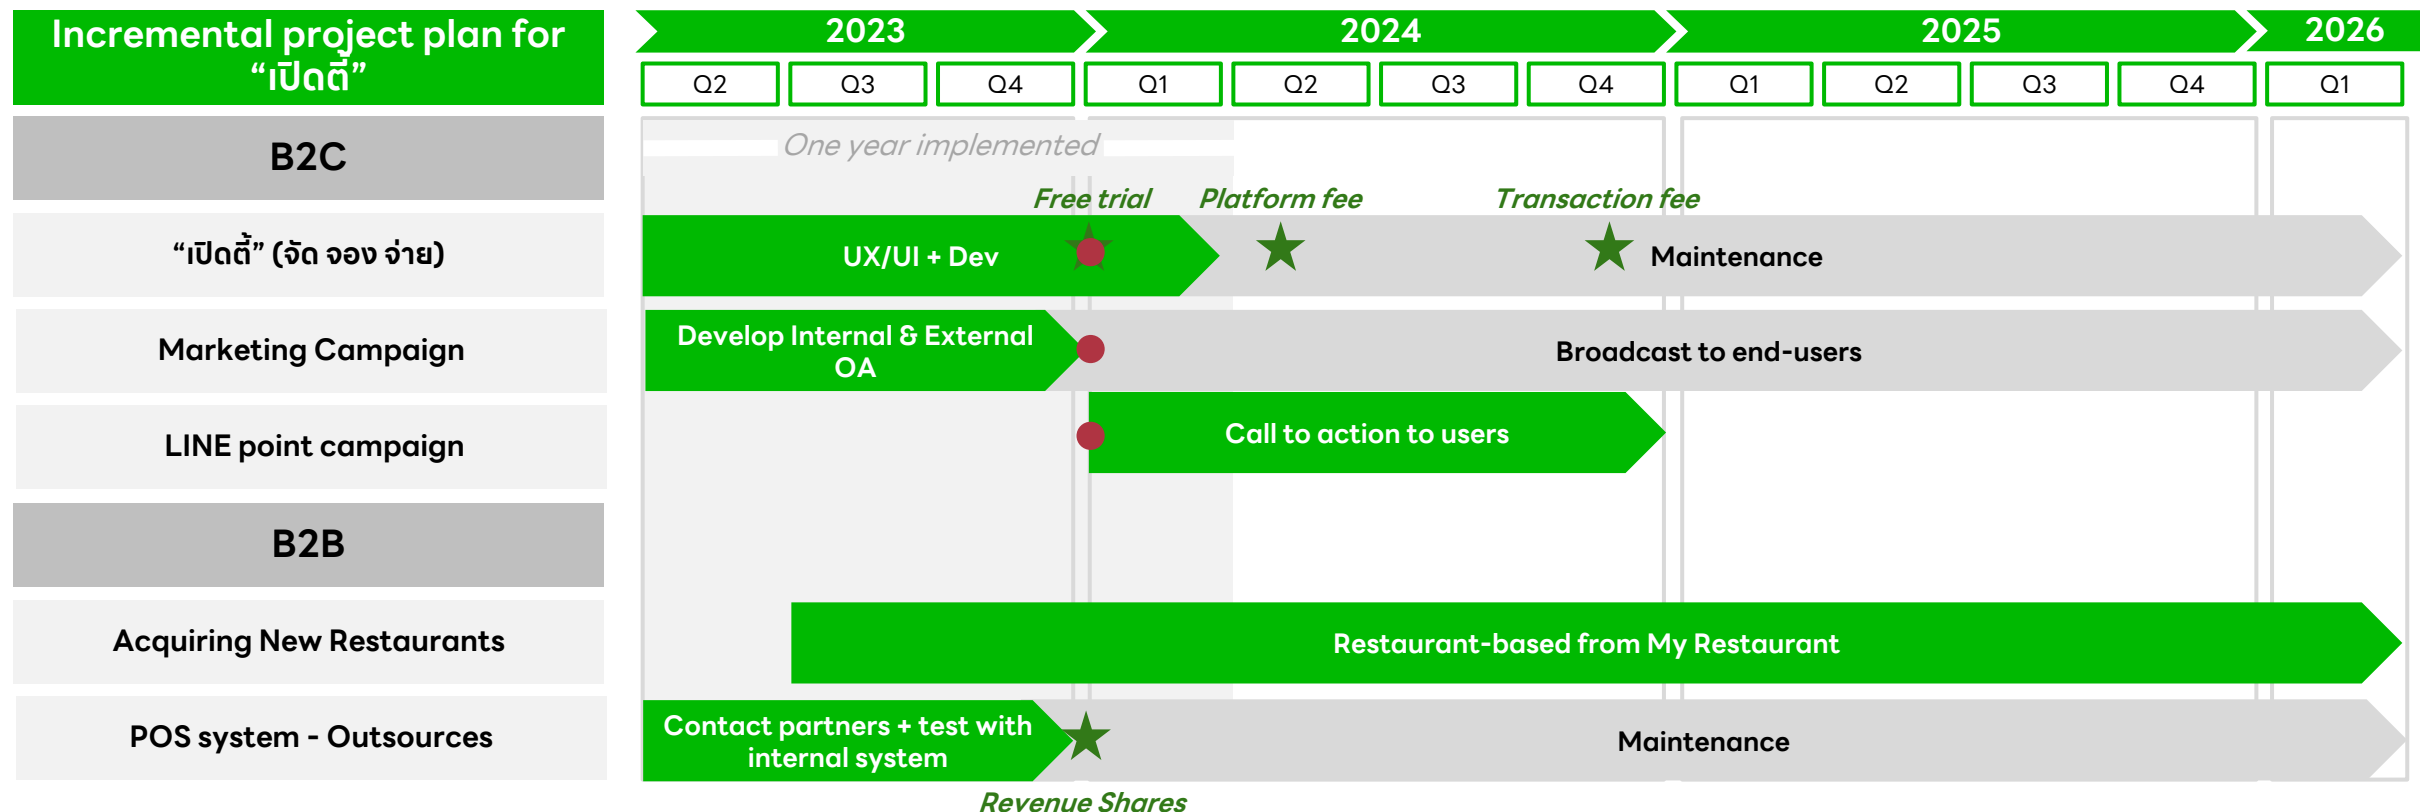

Launch in YouTube

Financial Impact

Implementation Timeline

Launch the features after 3 quarters of development with Free-trial, followed by Platform fees and Transaction fees

Future plan

Note: Develop and track performance in every months

Acquiring more restaurant partners which are not currently based in My Restaurant

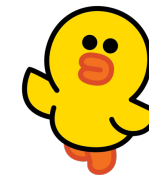

Increase customer-based by launch new industries, such as Travel industry and Activities industry

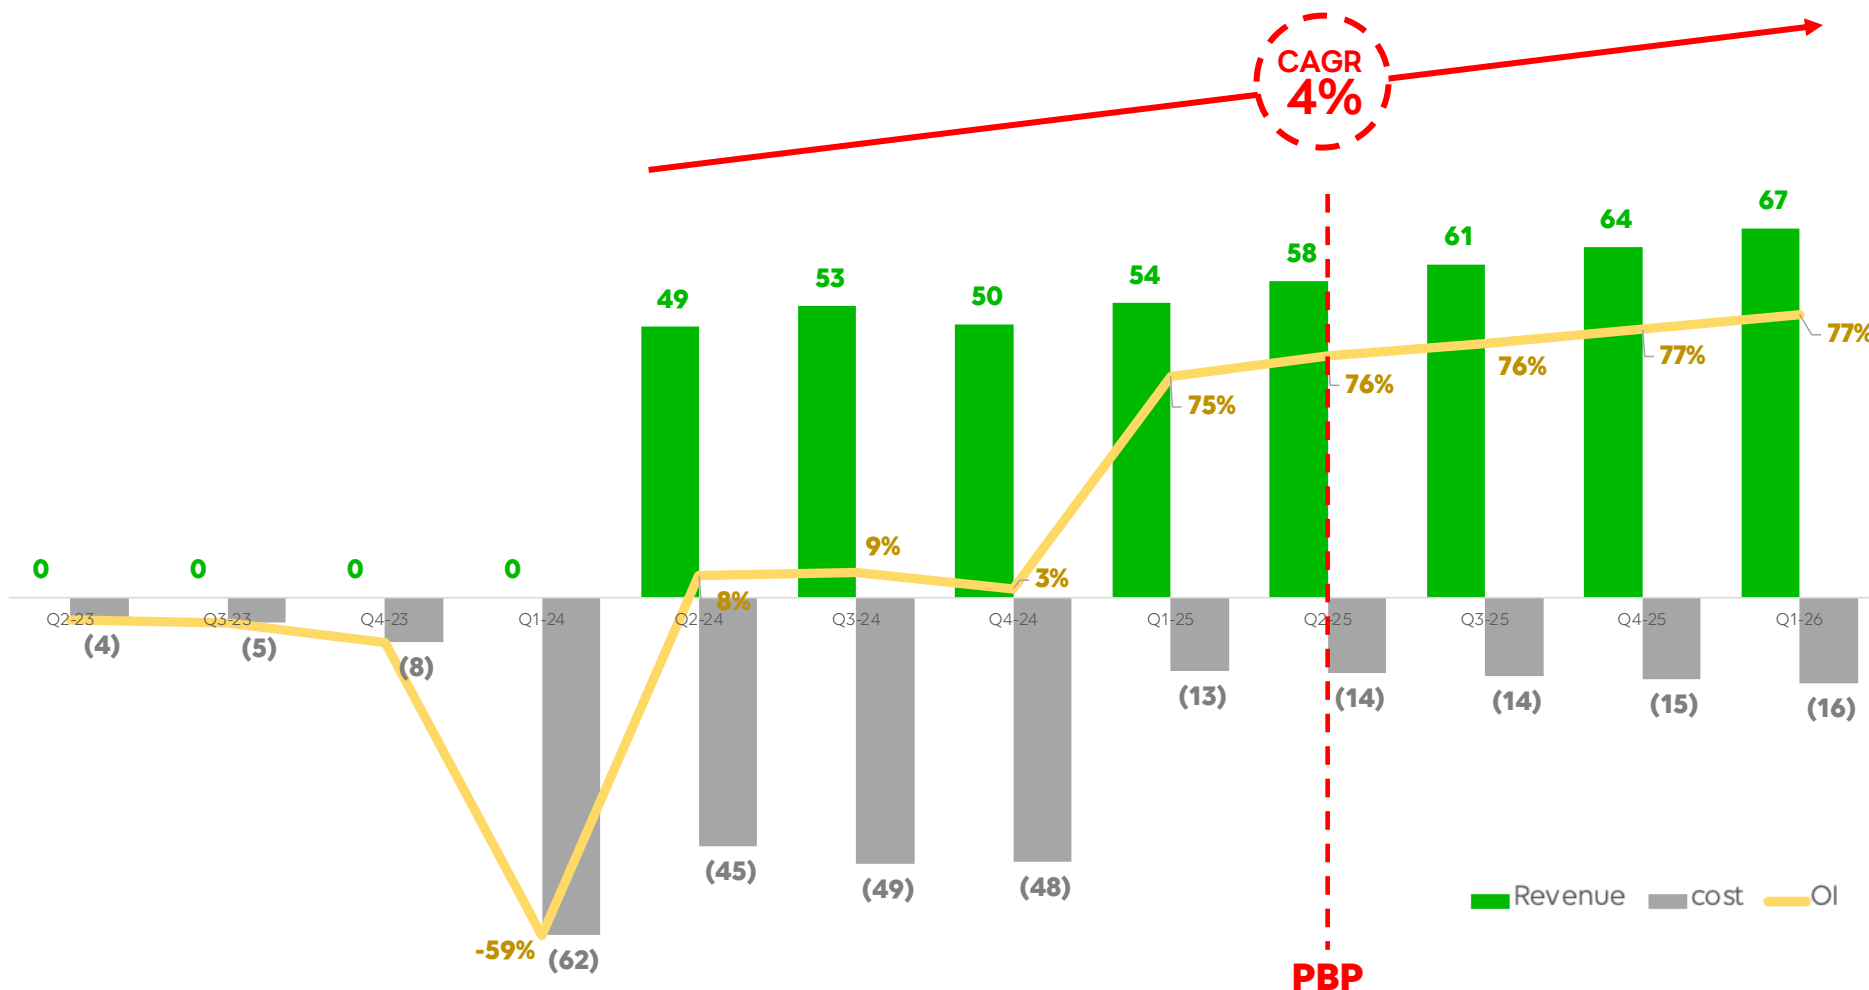

Legend: ● launch ★ Significant event

Revenue and Cost Projection

With the features, LINE will generate approximately 81% of operating income, while cost mainly come from RS

Operating Income Projection

Key Drivers

Revenue

- **Platform fees:** price driven by size of B2B
- **Transaction fees:** 2.5% of average meal price, driven by number of feature usage

Cost

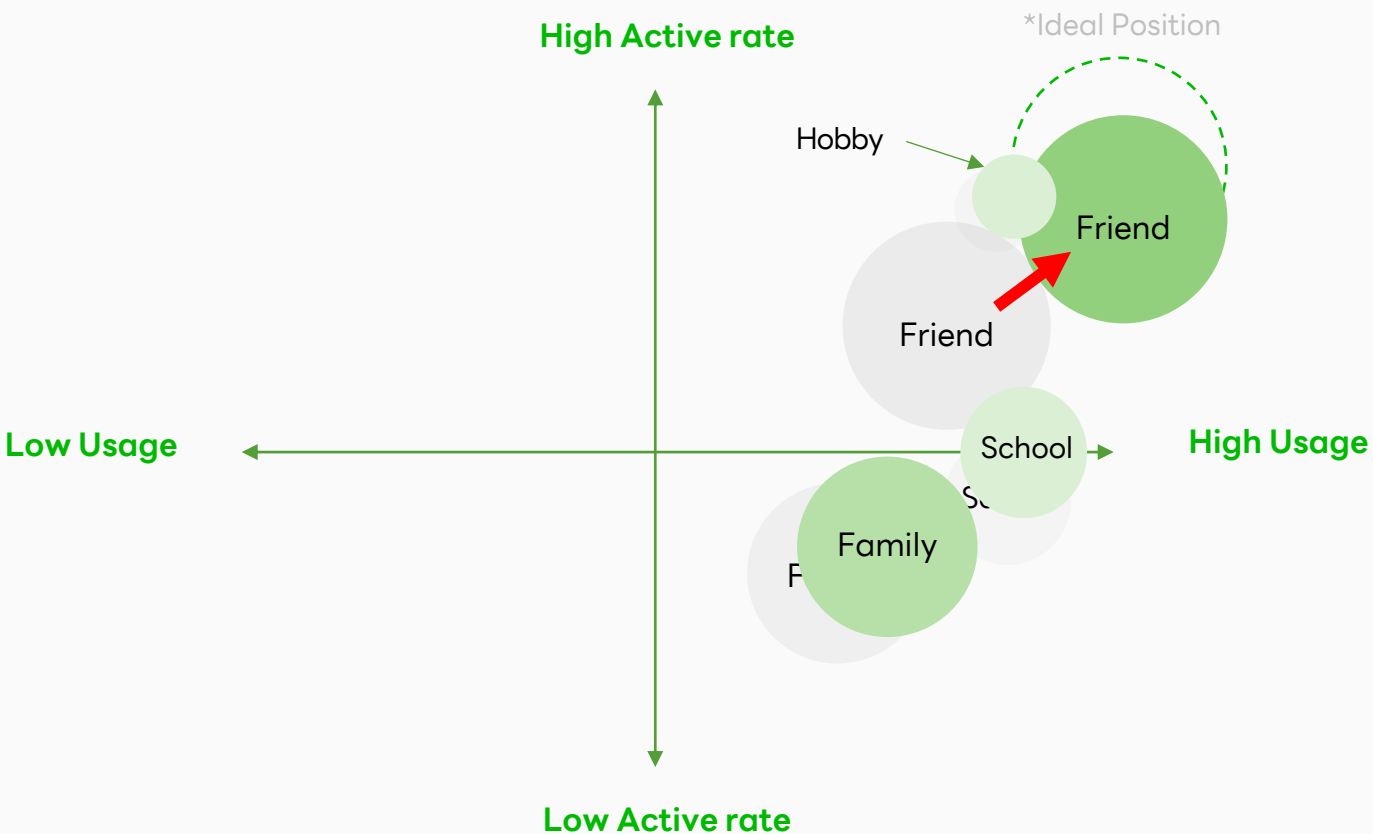

- **Revenue share:** paid to POS system partner
- **Marketing cost:** given points to end-users
- **Man Month cost:** both developing and marketing department

Impact

With 16% in active rate increased, Friend segmentation will close up to LINE's ideal position

Positioning Map

Impact

↑ 16%

Friend Active Rate

208 K

Customers who will use “ເປັດຕີ້” through 3 years

6.6 M times

Visit restaurants via “ເປັດຕີ້” feature in 3 years

Summarized Benefit

With our feature, LINE not only benefit, but also increase leveraging of restaurants and end users

With our Feature

Unlock Social Interactions:
